

Allakhverdiev S.I. actively participates in the organization of international conferences. Since 2004, he initiates the annual International Conference “Photosynthesis and Hydrogen Energy Research for Sustainability” in order to give the opportunity to scientists from all over the world to meet and discuss their findings in photosynthesis and biohydrogen field. This meeting attracts attention of international scientific community, and different institutes are chosen to be the conference venue. The first conference was held in Trois-Rivières, Quebec, Canada, and to present day 10 “Photosynthesis and Hydrogen Energy Research for Sustainability” meetings have already been conducted in different countries, such as Canada, Azerbaijan, Greece, India, and Russia. The 11th conference is expected to be organized in Bulgaria. The conference proceeds in two parallel research sessions: Photosynthesis Research for Sustainability devoted to studies of the photosynthetic apparatus, and Hydrogen Energy Research for Sustainability devoted to research on biohydrogen and fuel cell production. Both sessions included fundamental and applied aspects of research and work on artificial photosynthesis by using nanomaterials and nanotechnology.

Photosynthesis and Hydrogen Energy Research for Sustainability – 2022

from 1 to 7 October 2022 / Varna, Bulgaria

Dear Colleagues!

Continuing pandemic forces us to postpone the 11th International Meeting «Photosynthesis and Hydrogen Energy Research for Sustainability – 2021». We have reached an agreement with the Local Committee and ISPR Officers about moving the conference to next year, October 01-07, 2022.

Please, take good care of yourself and stay in touch!

Coordinator (since 2004)
Suleyman I. Allakhverdiev
